WATER RIGHTS  
SALT LAKE

From: Dave Wilson, President  
Midway Irrigation Company

Subject: Division of Water at Gerber Springs

Dear Mr. Riley:

Over the last few years Midway City and Midway Irrigation Company have experienced difficulty in measuring and dividing the flow from Gerber Spring. About four years ago, the Irrigation Company installed a valve and meter on the City pipeline, which cost the Irrigation Company \$5,000.00. The intent of the installation was to control and measure the flow of water to Midway City from the spring to their allocated 2 CFS right. The reaction from the City was to build a steel box around the valve and limit the company's ability to control the flow into the pipeline. The City has been able to draw over their 2 CFS right periodically by setting the valve when the storage tank is full instead of when the tank is below capacity and the water free flowing.

Midway irrigation Company would like to request that the River Commissioner assume the responsibility and control for the division of water at the Gerber Spring. If you have any questions about this request, I can be contacted at 654-1178 (home) or 654-3211 (work).

Yours truly,

Dave Wilson, President  
Midway Irrigation Company

cc: Mayor Reed Bezzant  
River Commissioner Sherman Giles
